Course Aim				
The aim of this course is to develop an understanding in students of health and health care systems from a global, national and local perspective.				
Course Content				
Health definitions and perspectives; Models of health and wellbeing; globalisation of health; determinants of health; health and social justice; health of individuals, communities and populations; World Health Organisation; World Bank; Australian Health Care System; health care system developing nations and other countries; Australian health priorities; Indigenous health; primary health care principles, health promotion and health education across the lifespan.				
Course Objectives				
No	Objective			
1	Explain the multi dimensional nature of health and its application to global populations.			
2	Discuss the determinants of health and how social justice strategies influence health outcomes.			
3	Examine the structure, function and outcomes of health care systems in Australia and other countries.			
4	Discuss the health care needs and priorities for Australians, and the impact of these on the individual, family and community.			
5	Discuss how primary health care principles impact on determinants of health.			
6	Explore how cultural identity may shape understanding of health and health care delivery.			
7	Examine the history, demographics, cultural and socio-economic factors of Aboriginal and Torres Strait Islanders and how these impact on health and access to health care.
