

What is PebblePocket

PebblePocket is an app powered by PebblePad that lets you quickly create assets on the go while online and offline.

It allows you to edit and save the assets you create on your mobile and send them to your Pebble+ Assets store.

You can link PebblePocket to your PebblePad account so you can also use the app to launch PebblePad in your mobile browser.

Please follow the step by step instructions below to learn what PebblePocket is and how to create an account to link with your PebblePad account.

If you have any questions please email chs-pebblepad@unisa.edu.au

App support ▾

About this app →

Created by the team at PebblePad, the nifty PebblePocket app allows you to continue to create evidence, reflections, and records even when an internet connection is proving elusive. You can use the app to work offline and your assets will synchronise automatically with your PebblePad account whenever you next have an internet connection.
