SP5 - 2021	IMSO	The video resources were amazing. Thank you.
SP5 - 2021	IMSO	All topics were current, informative and relevant to my professional needs. Obstetrics and Gyane could really be a course on it's own. There are so many topics to be explored with an ever changing technical environment , learning and applying new techniques is essential to the development of our profession. I am already applying multiple new techniques that I have learned about with this course in my day to day scanning with positive benefits for many patients. Allowing choice for assessments - especially when asked to achieve certification and project presentation. Availability of current resources through the portal. Structured weekly calendar was very useful to use as a guide for study - I followed this to keep on track The support from the course coordinator was amazing
SP5 - 2021	IMSO	Meticulous, highly informative and interactive! This course has immensely helped me in enhancing my professional skills and by incorporating this into the work place, this would definitely help other people in the profession. As I work in a remote Obstetric care setting, the lessons are invaluable for me in providing efficient and quality help in the diagnosis of patient's conditions.
SP5 - 2021	IMSO	Well organised with a lot of learning material
SP5 - 2021	IMSO	The assessments are focused on strengthening our clinical skills and practice. I particularly liked the structure of the clinical artefact, choosing a skill and reflecting at your overall progression. The majority of online lectures were of high quality with an array of content between gynae and obs. The lecturer Nayana promptly responds to any queries on the discussion board and email. Any anxiety regarding the course was also eased with the zoom introduction meet in the first week with a focus on learning and enjoying it.
SP5 - 2022	IMSO	Thought the assessments for this course were really interesting! Loved that they were relevant to our work, and found it really interesting to learn from the assessments of other students too
SP5 - 2022	IMSO	Allowed you to really explore your area of interest.

SP5 - 2021	IMSO	The pandemic played a major role, otherwise, we would have had more web based course discussions.
SP5 - 2021	IMSO	The topics are so extensive, this course could be separated into an advanced obstetrics course, and an advanced gynae course. It would allow those who specialise to delve even deeper into specific fields. I even believe it could be a course on its very own as many people specialise in Obstetrics and Gynae.
SP5 - 2021	IMSO	No
SP5 - 2021	IMSO	No I was very happy with it.
SP5 - 2021	IMSO	the content of the third trimester and multiple gestation could be updated to be more recent.
SP5 - 2022	IMSO	N/A
