Best Aspect

Term Code	Program Code	MCE Comment
SP2 - 2023	IMAP	Doing a systematic review is a good way to learn the process and understand what researchers do.
SP2 - 2023	IMAP	the online content was delivered at a very appropriate timely pace. steve was always approachable and happy to share and answer any questions about the lectures
SP2 - 2023	IMAP	there were plenty of resources for students to refer to during the whole module. It is a great idea to have the students to write up a systematic review which I think really encourages reading of articles and reinforces the learning content.
SP2 - 2023	IMAP	Assoc Prof. Steven Milanese has been a very valuable teacher in this course, although I have done academic written during my undergrad years, I had no clues of how to do it well and also wasn't quite understand the theory behind (But I was not being taught in UniSA during my undergrad, it was interstate, and I also wasn't a good student...anyway). However, under the teaching and guidance by Steve, I have now regain the missing puzzles from my undergrad years and also the confidence in academic writing, I never would have thought I could have written an academic writing myself in a better way than I was before. Therefore, I really would like to thank him and I'm grateful that I was taught by him !
SP2 - 2023	IMAP	The blend of online lectures and sources with the recorded ones.
SP2 - 2023	IMAP	1. PROFESSOR STEVE MILANESE!!! 2. Everything that Steve brings to the table- from his learnings, experience, humour, ease of making you understand a topic as dry as research. 3
SP2 - 2023	IMAP	Comprehensive and thorough explanations on key concepts provided through lecture notes, presentation and resources provided weekly sessions to recap the important take-aways from the lecture and clarify any doubts were very useful. quizzes were a good way to consolidate learning and highlight areas lacking in understanding
SP2 - 2023	IMSO	A huge amount of useful information to assist learning. Lectures and tutorials very helpful and clarified information well. I like the fact that all lectures/ tutorials are recorded.
SP5 - 2021	IMSO	Quiz- ability to study small sections at a time and gain marks in small parts.
SP5 - 2021	IMSO	The online lectures content is clear, focussed and relevant to the quizzes. This course has allowed me to use my metacognition, giving me the ability to scrutinise published material to inform a decision on best clinical practice.
SP5 - 2021	IMSO	Actual content was solid, though difficult to navigate. Lecturer was enthusiastic and knowledgeable

Need Improvement

Term Code	Program Code	MCE Comment
SP2 - 2023	IMAP	Well..... I don't know if there is anybody else can be better than Steve but good luck !
SP2 - 2023	IMAP	1. Keeping Steve's online lectures for subsequent batches as well. 2. This course could be done in the earlier half of the year because it really helps with the process of selecting research papers and studies for assignments and everyone would be able to extract better articles for all assignments for the other modules as well with the kind of knowledge they obtain from AHRET .
SP2 - 2023	IMAP	There could be more face to face classes instead of online classes as international students flew all the way here to pursue this programme. The university should look into having more in-person classes rather than online classes.
SP2 - 2023	IMAP	-
SP2 - 2023	IMSO	I would like to be able to see answers to quizzes. Makes it easier to learn from mistakes.
SP5 - 2021	IMSO	No it was well presented thank you.
SP5 - 2021	IMSO	The first 2 quizzes had not enough time. I was extremely rushed throughout them. The assignment due date would have been preferred to be towards the end of October to allow the content of the quizzes to be reflected upon and applied towards the assignment.
SP5 - 2021	IMSO	The resources are disorganised and in need of some good editing and some links don't work. The course calendar and assessment dates were all wrong. It all appears to have been cut and pasted from another course. Most of the examples were Physio related despite the whole cohort being Sonographers. The discussion boards didn't link properly. It would be good if the workshops discussed how to do the questions given in the workshops and worked through the examples. The quizzes needed more time and better wording/editing of some questions.
