Course Comments

Best Aspect

Term Code	Program Code	MCE Comment
SP2 - 2021	IGSO	It is a very detailed course and covers most of the relevant and current practices needed for a sonographer.
SP2 - 2021	IGSO	I appreciate the overall spread of weighting for the assessments. Given the expectations and quality expected for the posters, a 30% weighting seems fair
SP2 - 2021	IGSO	Great structure to the modules. Easy to follow lecture slides. Alot of extra learning resources were provided such as simtics, youtube, extra readings which help reinforced my learning.
SP2 - 2021	IGSO	- I really liked the layout of the learn online site. - The assessments were very appropriate to learning. - The weightings for all assessments were appropriate.
SP2 - 2021	IGSO	Very comprehensive. All resources are good quality, ample resources provided
SP2 - 2021	IGSO	Lots of resources available.
SP2 - 2021	IGSO	The interactive and videos resources.
SP2 - 2021	IGSO	Plenty of resources available
SP2 - 2021	IGSO	Strong attention to detail and content focused on clinically applicable principles.
SP2 - 2021	IGSO	Course content divided into four modules made sense. The new layout of the online platform made things easier to find - labelling content as essential and extra helped with study.
SP2 - 2021	IGSO	Lots of information provided from textbooks to lectures Constant quizzes throughout semester to ensure study is up to date Provided information on a range of pathological cases
SP2 - 2021	IGSO	Excellent resources. Gives a clear insight on all topics. Well organised. Thank you so much Sandy for your videos and all other resources.
SP2 - 2021	IGSO	Great lecture recordings and study material resources
SP2 - 2021	IGSO	The information provided in this course helped me tremendously. It broadened my understanding of obstetric ultrasound and the importance of thorough examinations. Sandy was very supportive, understanding and fair. She really kept me going.
SP2 - 2021	IGSO	Putting gynaecology with Obstetric ultrasound together is a nice arrangement.
SP2 - 2021	IGSO	Overall layout was excellent, modules were very easy to follow
SP2 - 2021	IGSO	I like the ability to be able to go at my own speed.
SP2 - 2021	IGSO	The lectures, abundance of notes and Sandy!
SP2 - 2021	IGSO	Sandy is a great lecturer who is very concise with her teachings. Sharing her experiences as a sonographer makes her very reliable.
SP2 - 2021	IGSO	High standard of course materials, Updated information about different ultrasound modalities.
SP2 - 2021	IMSO	The recorded lectures are very useful as it makes me feel as if I am back in class with the rest of the students. SIMTICS portion of the course is also useful to read up on more information and attempt the quizzes.
SP2 - 2021	IMSO	Online discussion board was very helpful, able to work with students and teacher and ask questions. I liked the recorded lectures and tutorials too, and access to the ebooks, all very helpful! The posters made me nervous, but only because I don't like listening to my own recorded voice!
SP2 - 2021	IMSO	Recorded content, prompt replies from the lecturer in forum posts & the poster assignment
SP2 - 2022	IGSO	Such a big topic and so many things to cover but it was done quite well and in a systematic order. I really liked all the case studies Nayana posted and the discussions that went with it.
SP2 - 2022	IGSO	I felt the positive encouragement, depth of knowledge and the ability and structured way that was shared helped build my confidence in O&G, greatly. I have enjoyed this course and feel it has improved and reinforced my learning. Definitely the best US course to date!
SP2 - 2022	IGSO	Discussion forum and feedback from assignment
SP2 - 2022	IGSO	Good lecture series.
SP2 - 2022	IGSO	Clinically focused and relevant.
SP2 - 2022	IGSO	Nayana was an excellent source of motivation, her passion and excitement in obstetric and gynaecological ultrasound really pushed me want to do well in this subject. Regular feedback was provided that was useful and constructive and the assessments were a great way to add to our learning and resources, particularly the case study poster assignment. Thank you Nayana!
SP2 - 2022	IGSO	content of lecture materials were good and easy to understand.
SP2 - 2022	IGSO	Nayana is very helpful with all my concerns, she would reply even if she's away from work or late evening. She's very dedicated on what she do.
SP2 - 2022	IGSO	well prepared course contents and resources.
SP2 - 2022	IGSO	This is a large subject. I'm not sure why Obstetrics and gynaecology is all in one subject. I believe it would be better to separate the two subjects as Monash does. There is an entire subject in the first year and first semester which was 13 weeks of wasted time (professional issues with sonographers). This could be far better utilised to allow for more learning of the gynaecology subject instead of briefing over it as we did.
SP2 - 2022	IGSO	The poster assignment was a good introduction to the area of creating and presenting on a topic.
SP2 - 2022	IGSO	Good overview but I think there should be more on gynaecology. Just too basic.
SP2 - 2022	IGSO	Poster topics -would be better if we could choose rather than being given a topic as we could follow something we're interested in or use an interesting case from our workplace
SP2 - 2022	IGSO	The study guides for each module and the poster assignment
SP2 - 2022	IMSO	The course was interactive, with student participation and prompt instructor feedback. I also appreciated the unorthodox assessment methods, which are the bounce back task and poster assignment. While the course was very intensive, the guided learning modules and course calendar enabled me to learn the required material in my own time.
SP2 - 2023	IGSO	Zoom sessions and study guides
SP2 - 2023	IGSO	Plenty of resources
SP2 - 2023	IGSO	Tuts lectures study guide and check lists for each module Sandy's video clips/cases Poster project - challenging in many ways yet rewarding and learnt a lot and enjoyed this the most Able to go at your own pace flexible A variety of resources
SP2 - 2023	IGSO	Easily to follow course content even with the large volume
SP2 - 2023	IGSO	Set out really well, considering the amount of content!! The 4 modules keeps it contained, and does not seem as overwhelming. Learnt a lot, thank you!
SP2 - 2023	IGSO	Lots of access to literature studies, presentations and modules to assist with learning at your own pace.
SP2 - 2023	IGSO	Good amount of assessments
SP2 - 2023	IGSO	Emma Godriks lectures were fantastic. The layout of the course was done in an easily readable manner.
SP2 - 2023	IGSO	I personally enjoy learning about the topic of obs & gynae, but I honestly don't think there are any strengths of this course structure and layout. The course outline is the only thing that has saved me and given my guidance.
SP2 - 2023	IGSO	Strong support from the course coordinator. Curriculum is in full detail and easy to study.
SP2 - 2023	IGSO	I really liked the format of only having 4 modules. They were easy to follow and work through. The recorded lectures were of a high quality.
SP2 - 2023	IGSO	Lots of content
SP2 - 2023	IGSO	well structures course content, that was easy to follow.
SP2 - 2023	IGSO	The amount of useful extra reading and resources available. The structure of timeline and deadlines to keep us on track. Discussion forum was good and quick responses from Sandy.
SP2 - 2023	IGSO	extensive course
SP2 - 2023	IGSO	Using Emma Godrik's lecture recordings and other external videos. Simple course outline.
SP2 - 2023	IMSO	This course had a lot of content - there were a lot of great resources and links. I particularly found previous lectures from Emma Godrick and Sean McPeake very clear.
SP2 - 2023	IMSO	well designed layout of topics

Need Improvement

Term Code	Program Code	MCE Comment
SP2 - 2021	IGSO	No, I am satisfied with the course delivery system.
SP2 - 2021	IGSO	More online, interactive sessions. For myself personally, I have found them to be hugely beneficial for my learning with other courses. The guidance and support they provide are unparalleled, even if the sessions are brief. In future, at least a third revision session would be a great inclusion in the course.
SP2 - 2021	IGSO	More revision materials would be a great improvement too - more than one old exam paper that appeared to have questions deemed to advanced for the scope of the course, which was not communicated initially.
SP2 - 2021	IGSO	With morphology, I think it'll help if there are better diagrams of the heart and brain to show the different planes we need to obtain and the corresponding level through the fetus to help with visualization. With third trimesters, we didn't go through different positions of breech and what it means if we do find the baby in breech. Not sure if that is for the advanced course.
SP2 - 2021	IGSO	Poorly structured (4 modules - perhaps would benefit from breaking it up into more manageable bites and to provide further context).
SP2 - 2021	IGSO	N/A
SP2 - 2021	IGSO	Good content. This unit really helped me with my learning.
SP2 - 2021	IGSO	Course content very vast and adequate
SP2 - 2021	IGSO	I found my assignment topic to be very difficult (although I still got a great mark) perhaps maybe just some more explanation on what was expected as other topics seemed quite simple compared to mine
SP2 - 2021	IGSO	Not enough information about fetus heart. The old videos provided can't hear clearly. Study guides' contents are disordered.
SP2 - 2021	IGSO	It is hard to know the depth required to go into for each area.
SP2 - 2021	IGSO	- More zoom sessions throughout the semester especially for exam revision since it is deemed the 'hardest' subject in the course. - Many of the study guide questions were not answered in the text resources provided and I had to find better relevant text books myself.
SP2 - 2021	IGSO	The PDF files uploaded should have a white or light background - I personally like to watch the lectures and write the notes down on the slide. All the coloured backgrounds for the PDFS makes this very hard and as these are in PDFS, even trying to type notes on the slide makes the notes hard to visualise. Would definitely recommend changing the background colour.
SP2 - 2021	IGSO	I am very happy with this course
SP2 - 2021	IGSO	Extra revision sessions
SP2 - 2021	IGSO	no
SP2 - 2021	IGSO	More pathology resources needed.
SP2 - 2021	IGSO	Obs and gynae is a massive subject and I feel it should be separated into two different units.
SP2 - 2021	IGSO	I would like to be able to save some of the online presentations if possible to review again at a later stage.
SP2 - 2021	IGSO	Its a very full on course and am not sure if breaking it into two parts would be an option.
SP2 - 2021	IGSO	This course was very well structured and appropriate marks were allocated to assessments. Plentiful learning resources were also provided. I couldn't fault this course.
SP2 - 2021	IMSO	Just one thing, for the quizzes, I would like to know where each question is from, so if I get a question wrong answer I know which reading or lecture I need to review. Maybe it could tell you after you've completed the quiz. Because some questions I couldn't work out where the content was from.
SP2 - 2021	IMSO	Nopes, all good. Thanks! :)
SP2 - 2021	IMSO	None
SP2 - 2022	IGSO	The bounce back reflective forum was a disproportionate waste of time for the marks given. This task should be scrapped. Severe lack of revision material and past papers. Topics not assessed should not be taught. This unit severely needs tutorial sessions- especially for how difficult it is. Apart from the 'revision session', no tutorial sessions were held throughout the semester - 'drop in sessions' (which are held during work hours no less) are utterly inadequate and are not a substitute for tutorial sessions. The revision session was simply working through the practice exam (which everybody had already done at that point) and being told content 'which was in the advanced obstetrics course'. It would be hard to imagine that anyone felt confident after that revision session as was evident by the complete silence when the lecturer asked if we felt better after the revision session.
SP2 - 2022	IGSO	none
SP2 - 2022	IGSO	Yes, I think double checking and updating any links to reference texts or extra readings so they work would help streamline study.
SP2 - 2022	IGSO	I found this semester personally challenging as I had less time with 2 units of study, work and some difficult family events, any thing that streamlines and maximises study time would be a big plus.
SP2 - 2022	IGSO	Regular zoom lessons throughout the semester. I know there was lunch time meetings but they excluded a lot of students who are working those hours.
SP2 - 2022	IGSO	Nil
SP2 - 2022	IGSO	More lectures and practice questions would be useful
SP2 - 2022	IGSO	See above
SP2 - 2022	IGSO	More practice questions or case studies with answers provided would help give us examples of the sort of responses expected of us. More weekly or fortnightly zoom sessions to discuss example case studies for each of the modules would be good in evaluating where we currently sit in our progress of studies. It would also allow us to bounce ideas off each other.
SP2 - 2022	IGSO	This course was brilliant and worked extremely well in its layout and assessments.
SP2 - 2022	IGSO	I felt that having the bounce back assessment, poster assignment and the assessment quizzes was a lot. The bounce back assessment and poster assignment were both very time intensive. I think maybe if there were less components to the bounce back assessment and instead of doing a self marked rubric and comments, maybe just comments
SP2 - 2022	IGSO	More regular zoom sessions. We only had one zoom session at the start of the semester and one zoom at the end of the semester. Given the large amount of content covered throughout the semester, more zoom tutorials would've been useful.
SP2 - 2022	IMSO	No major changes needed, except maybe more video lectures or tutorials? Regardless I feel the course resources and structure are excellent the way they are.
SP2 - 2023	IGSO	There is a big emphasis in obstetrics on aneuploidy, soft signs and hard signs of trisomy 21,18 and 13. It is not taught in the lectures, rather go read an article. Our practice drills it into staff about the soft and hard markers. Can there please be this information in the next learning guide for students?
SP2 - 2023	IGSO	links provided on learnonline for readings are not accessible. They can be checked before telling the students to read the materials. All teaching materials could be checked before uploading on learnonline to avoid confusion.
SP2 - 2023	IGSO	Clearer assignment information of what is expected and required.
SP2 - 2023	IGSO	It is such a huge unit that it's hard to cover all the material required. A bit more practice with image interpretation would be helpful, such as practice quizzes with just this to focus on.
SP2 - 2023	IGSO	N/A
SP2 - 2023	IGSO	Updated lectures
SP2 - 2023	IGSO	A little more direction on assignments.
SP2 - 2023	IGSO	More practice revision questions
SP2 - 2023	IGSO	Some links to textbooks and e-readings don't work. Difficult to find resources.
SP2 - 2023	IGSO	For the image interpretation slides I feel I learn more by attempting in my own time and then discussing it live such as in a tutorial like one of the times we did. (This is just my preferred method of learning as there's also a chance not to only give answers but also discuss it and ask questions/clarify topics. Maybe on the discussion board to create more student interaction create sets of weekly questions maybe even just 2 or so to not overwhelm but just an another form of learning and more discussion. I feel not everyone used the discussion board and it had great potential as a learning tool
SP2 - 2023	IGSO	I didn't particularly like the audio presentation assessment. I found it would have been more beneficial and less time consuming to just have covered that in an essay format. My topic was useful and relevant to the course but I know that there were more broad and not relevant topics delegated to other students and I think that this is a massive disadvantage to those students. Also I think the correct answers to the online quizzes should be given at once completed the test or due date is past, especially for written answers.
SP2 - 2023	IGSO	Whatever I learned here is good enough to apply in my practice. Best curriculum!
SP2 - 2023	IGSO	10000000% - Clinical Logbook: Firstly, such a waste of paper, we are trying to save the planet right? VERY inconvenient taking photos, deleting old ones, uploading them, doing the eportfolio etc etc etc. SO outdated way of submitting paperwork and not efficient. Suggestion: online logbook and streamlined. - E-portfolio: is all over the place, the jumping back and forward between sites is so painful, I have to find the instructions everytime and just finding the instructions is a hard task. I can't even find where eportfolio located on the unisa site and end up googling it everytime.

Term Code	Program Code	MCE Comment
		- Additional resources: Lecture standards are poor, mostly all prerecorded from previous years, the sound quality is poor, one of the lectures I completely couldn't understand as the voice was so muffled. It's just a sign of poor organisation and feels like a thrown together course. - I feel like in this subject I have been told to read every textbook. I am a visual learning, reading textbooks is not the way I learn. Why can't the lecturers get creative, become more involved, and show some enthusiasm. I am not sure what I am paying uni fees for, I can easily access all these texts at work and I am learning mostly through my clinical site and tutor. - Assignments: Why is there SO much emphasis on things posters looking nice?! Is it not the content that is most important. The rules of the assignments changed through out the period of it being submitted. I enjoy doing the assignments but the way they are to be submitted is so stressful and time consuming. - Simtiks: such a useful platform and tool through out my course so far, the notes were so helpful that were included., then this tool all of a sudden got removed, "the uni isn't paying for it!!! Are you kidding?" -Quiz: additional questions of which haven't been taught. Short answer questions where the word is slightly different in the lecturers answer and then marked incorrect even though it is the same answer.
SP2 - 2023	IGSO	The marking rubric for the poster assignment was slightly difficult to correlate with a poster topic that was particularly broad as it was more pathology focused.
SP2 - 2023	IMSO	maraha is not a user friendly experience
SP2 - 2023	IMSO	Some of the lectures seemed to be time wasting due to technical difficulties. The zoom sessions weren't as interactive for content as I was hoping
