Course Comments

Best Aspect

Term Code	Program Code	MCE Comment
SP5 - 2021	IMNS	Online learning that was structured, informative and easy to navigate. Online assessments extremely helpful in preparing you for assignments.
SP5 - 2021	IMNS	Comprehensive course topics, multiple sources of learning resources and great interaction with knowledgeable and experienced lecturer.
SP5 - 2022	IMNS	The Zoom meetings were invaluable. The course coordinator was fantastic. There are many, many resources within the course topics.
SP5 - 2022	IMNS	More tutorials More lectures
SP5 - 2022	IMNS	lots of information that increases the student's knowledge and confidence in participating, evaluating and applying research.
SP5 - 2022	IMNS	The indepth knowledge base of research
SP5 - 2022	IMNS	The instructor, Mike, who was extremely supportive and enthusiastic throughout the course, was the course's greatest asset. He used every opportunity to deconstruct and humanise this complex topic. The course's electronic readings were the second point. It was relevant to the subject matter and greatly aided with the assignments.

Need Improvement

Term Code	Program Code	MCE Comment
SP5 - 2021	IMNS	no
SP5 - 2021	IMNS	Despite double checking all the media settings on my laptop, many of the lecture videos didn't work properly.
SP5 - 2022	IMNS	Sometimes it was not easy to navigate forums. Too many sources of information
SP5 - 2022	IMNS	Less activities in this course would be much preferable so that students may spend more time exploring the topics in depth. It was rather difficult to combine work, study, and family life because the most of us, or perhaps all of us, have full-time employment as well.
SP5 - 2022	IMNS	The course has a huge amounts of reading material that is describing in many cases the same concepts. There is also reading material amongst this that is just for information only. The amount of time one has to spend going through the hundreds of reading materials to extract the information needed is disproportionately high, not allowing much time for the actual writing of the assignments. The assignments themselves, especially assignment 2 that is listed at 4000 words excluding the summary table (which can go up to another 5000 words) is only valued at 35% out of the total mark which seems quite small in comparison with the amount of critical thinking plus writing time involved. This would have been ok, if the reading material would have been presented in a more compressed form. A student then, has to decide between properly reading and learning the information in the reading materials (and doing the activities for the forums) and starting to write this big assignment that in the end is valued at only 35%.
SP5 - 2022	IMNS	I felt the course work and materially were unjustly large.
SP5 - 2022	IMNS	The lectures by Anne were extremely interesting, however very overwhelming. They are difficult to listen to and almost feel a little repetitive. I found it more useful to read the slides in my own time and not listen to the hours and hours of lectures.
