Logical structure and organisation of ideas and well-developed links between sections.	Assignment is engaging. WITH High level of communication. Presentation is coherent and very easy to follow	Visual and written elements are highly integrated. Assignment flows well, is coherent and succinct. Professional and captivating. Content and quality of the presentation worthy of submission in a conference
F) Academic Integrity Weighting 10%	NO	some integration of sources to cover key concepts which is primarily summarised in a descriptive manner.	Sources demonstrate good integration from the various sources used to cover key concepts with some analysis.	Sources are integrated and analysed well in the content to cover key concepts.	Sources are integrated exceptionally well in the content to cover a comprehensive and succinct analysis of key concepts.

Remember, if student fails **Academic Integrity section** the overall mark for the presentation is a fail.

Feedback:

Well done, _____, this was a great Protocol Review- you clearly identified the issue, and discussed its clinical importance and significance.

Your evidence demonstrated this is a clear issue for sonographers, and you discussed this in great detail

*Obviously, sonography is a visual media, so it would have been great to have a few more Ultrasound images demonstrating _____ in your presentation
BUT the information provide was exceptionally relevant – great speed at presenting as well – I can tell you will present at a conference in the future.*

It was great to see students engage with your presentation on the review sharing forum as well – some great comments there.

But as one of the final aspects of your sonographic study this was a great protocol review, congratulations and well done.
