

	Supervision level	General student characteristics	Communication	Technical aspects	Patient Care	Patient assessment, clinical decision making/reasoning	Image Critique/interpretation	Department procedures/policies
<p><b>Fourth Year (First Half)</b></p> <p><b>Course:</b> <b>Medical Imaging Clinical Practice 3</b></p> <p><b>Independent Student</b></p>	<p><b>Collaborative Supervision characteristics:</b></p> <ul style="list-style-type: none"> <li>• Tailoring style of supervision to what the student already knows.</li> <li>• Immediate feedback still encouraged.</li> <li>• Able to withdraw slightly to behind the control panel for supervision</li> <li>• Instructions are able to be more complex</li> <li>• Still assessing suitability of patients/clients for the student's level of comfort with the procedure/examination. At this stage the student is encouraged to be actively involved in this process</li> </ul>	<p>Good with basic examinations/procedures on less complex patients/clients. Ability to undertake, with supervision, more complex examinations/procedures on more challenging patient/client presentations.</p>	<p>Improved patient interaction. Able to explain procedures to patients/clients utilising suitable language More eye contact and personalised instructions for the patient.</p>	<p>Integrating knowledge of previous cases with academic knowledge Still needing assistance with exposure adjustment for unusual patient presentations. More aware of underlying pathology and its effect on exposure selection. Examinations are still requiring extra time at this stage.</p>	<p>Improved patient interaction More eye contact and personalised instructions for the patient Able to manage more complex patient presentations and auxiliary equipment. Able to anticipate patient care issues associated with radiographic examinations and procedures.</p>	<p>Integrating knowledge of previous cases with academic knowledge. Coping with more than one demand at a time Developing strong history taking skills and is now able to act upon information gained and make suggestions to improve patient experience. Still needing assistance in this area at this stage.</p>	<p>Critiquing all images produced though at times requiring assistance to decide if sufficient or how to correct more complex examinations. Able to identify and name common abnormalities in images produced. Good use of medical and radiographic terminology. Complex abnormalities may be identified but not named at this stage.</p>	<p>Understands and implements all departmental policies and procedures. Able to identify procedures required to implement improvements. Comfortable in the clinical environment though may still be apprehensive in remote or unusual locations such as theatre or wards.</p>
